**MEGLOBAL RECEIVING CARGO FOR NEW OYSTER CREEK PLANT**

**Freeport, TX (August 2, 2018)** – In July, Port Freeport welcomed the Jumbo Kinetic which brought in heavy cargo for MEGlobal’s new facility in Oyster Creek. The heavy cargo was two 1100-ton reactors and preheaters. Mammoet facilitated the safe and efficient movement of the cargo onto barges that would carry it to the construction site.

Construction of MEGlobal’s new facility began in late 2016 and is expected to be completed by the end of 2019. MEGlobal is a fully integrated supplier of monoethylene glycol (MEG) and diethylene glycol (DEG), collectively known as ethylene glycol (EG). EG is a raw material used in a wide variety of products and applications including the manufacture of polyester fibers, polyethylene terephthalate resins (PET), antifreeze formulations and other industrial products.
