

Chris Hogan

Director of Protective Services

As the Director of Protective Services, Chris Hogan serves as the staff authority. Chris Hogan brings over three decades of distinguished leadership in homeland security and emergency services, marked by a career of progressive responsibility and impactful contributions to public safety. As a former Fire Chief, Chris demonstrated exceptional crisis management skills, leading teams through high-stakes incidents including commercial fires, natural disasters, aircraft crashes, and bomb threats. His strategic oversight ensured the protection of lives, property, and community well-being, solidifying his reputation as a trusted authority in emergency response.

With more than 20 years of specialized expertise in homeland security and counterterrorism, Chris has made significant contributions across both public and private sectors, with a focus on safeguarding critical infrastructure in the chemical, energy, and transportation industries. His strategic insight and leadership earned him an appointment to the Texas Private Sector Advisory Council (PSAC), where he advises the Governor on homeland security policies impacting private sector operations and critical infrastructure protection.

A proven collaborator, Chris has spearheaded initiatives to foster partnerships among government agencies, private organizations, and stakeholders, driving the development of comprehensive strategies to enhance national security. His ability to navigate complex threat environments and build resilient frameworks has strengthened collective efforts to mitigate risks across the homeland security and emergency response domains.

Currently serving as the Director of Protective Services at a major seaport, Chris continues to leverage his extensive experience in homeland security and counterterrorism to ensure the safety and security of critical transportation infrastructure. His lifelong dedication to public safety and national security underscores his enduring impact as a leader in these vital fields.

Education

Chris earned his Bachelor of Science Degree in Engineering Technology from West Texas A&M.

Personal

Being raised in Angleton, it is very important to Chris that the Port helps support the local economy and provide the community with a port that they can be proud of.
